

EXAMPLES OF GENTOO APPLIED BY HVLP SPRAY GUN

Dust, debris, gels, mottling and orange peel are things that may affect the appearance of Gentoo that are the result of the spray application.

Example of a good coating (no mottling or orange peel). Some dust / debris is in the coating. This could be minimized by spraying Gentoo in a cleaner environment.

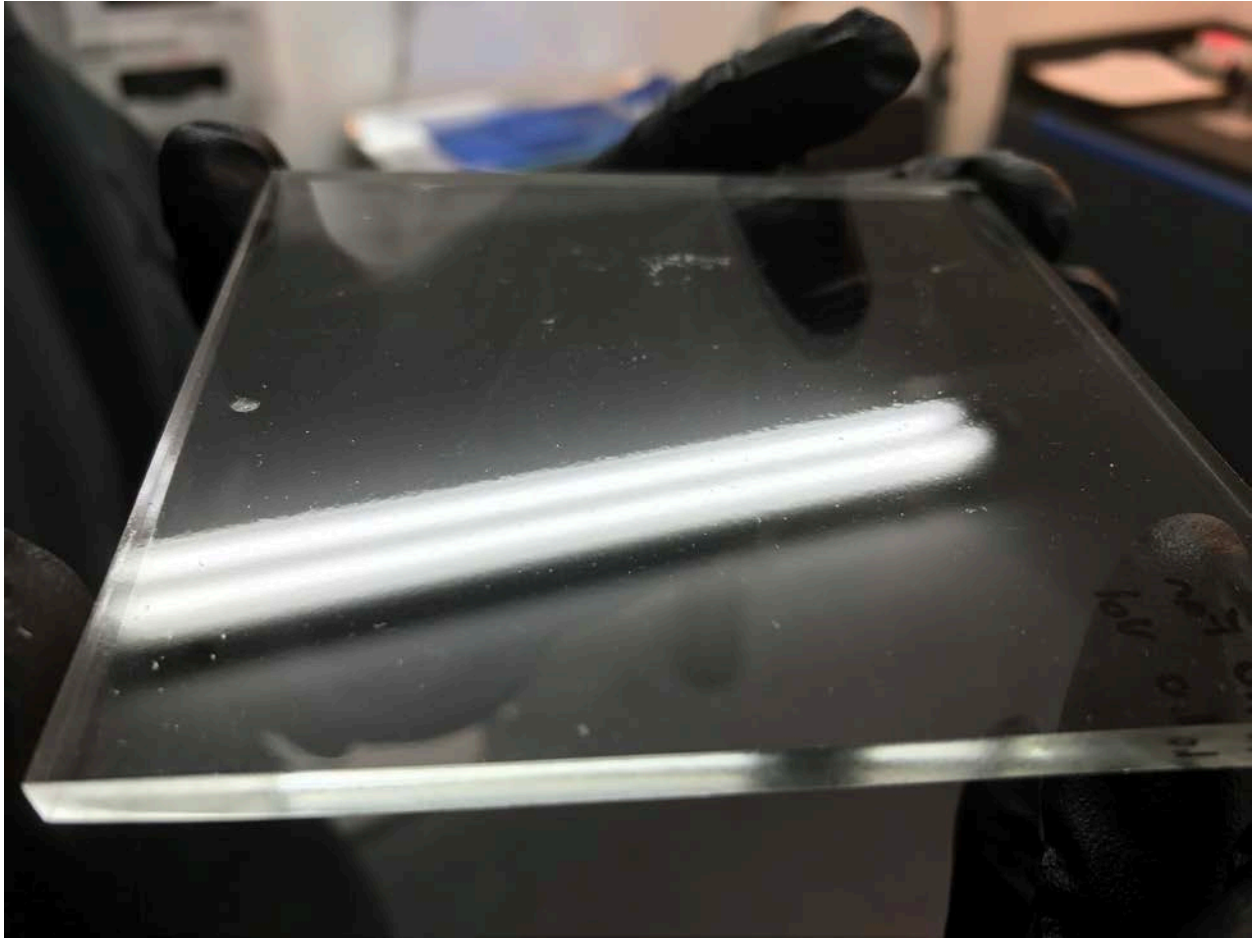

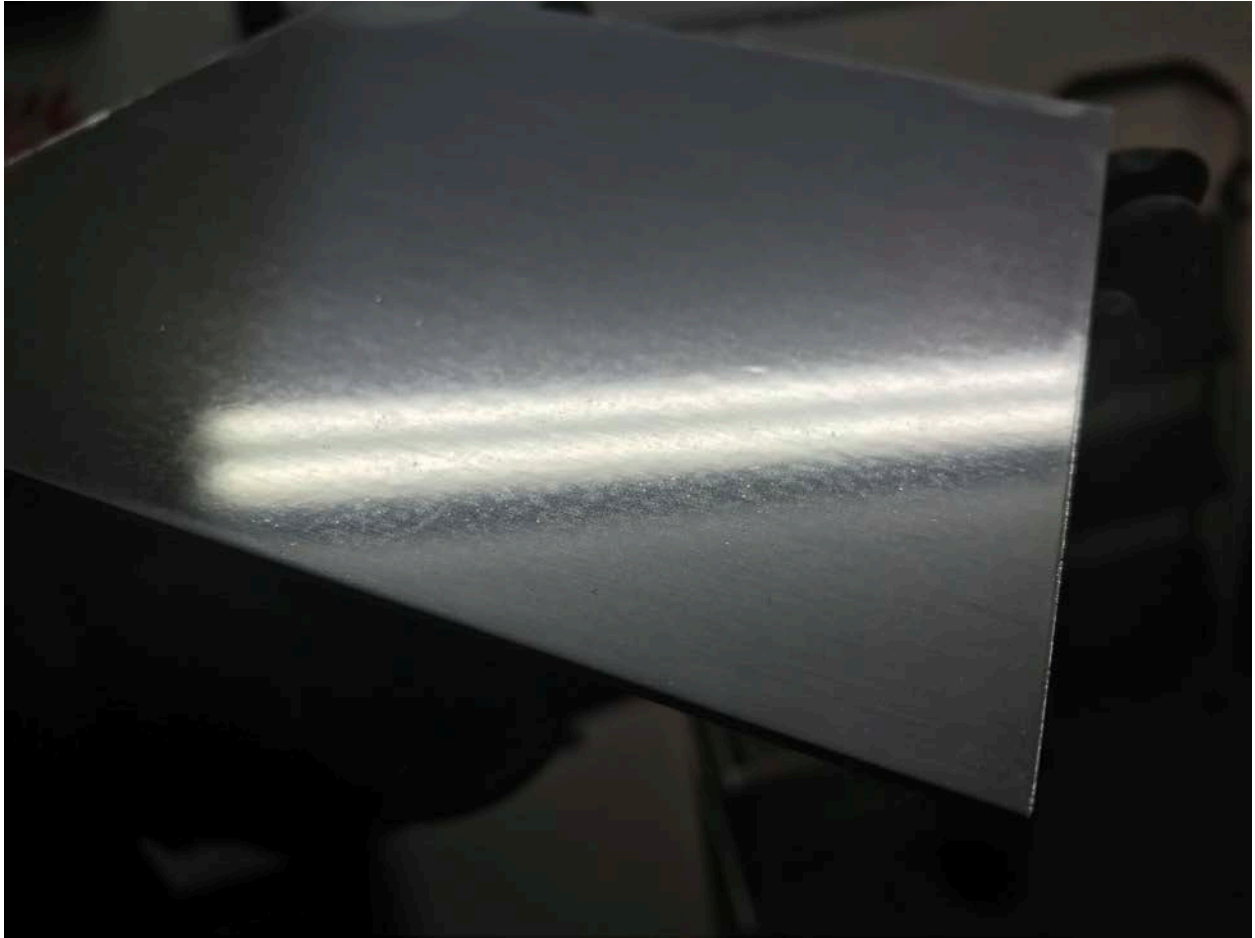

Example of mottling on glass.

Example of mottling on aluminum.

Example of “orange peel” on glass. This is the rippled effect seen around the reflection of the overhead light.
